ABOUT US

Platanoso (PLNT) Is a community-driven token created on the Binance Smart Chain (BSC) blockchain. As part of our tokenomics, all holders will be rewarded back in a stable token. Platanoso (PLNT) will donate towards humanitarian efforts and causes in the tropical communities while bringing crypto education to various communities physically and virtually.

OUR OPPORTUNITY

The developers of this project saw an opportunity to disrupt a polluted token ecosystem filled with scam tokens and rug pulls (removing liquidity thus allowing no buy/sell transactions to happen) pumps and dumps are the names of the game in this field. There are no actual donation tokens for a highly sentimental and pressing cause, such as the tropical communities in the ecosystem.

THE TECHNOLOGY

We realized that the power of blockchain allows for anyone to participate in a permission less, trustless, and thoroughly transparent environment. No intermediary is needed to participate in any projects. It's the web 3.0 revolution, and it's here. Thus, upon seeing these obvious caps, Platanaso was born.
