Platanaso (PLNT) is a community-driven token that rewards holders while at the same time providing much-needed donations to Tropical communities for humanitarian causes. Every week, a donation will

be made based on the project's market cap. Platanaso (PLNT) is a donation-based and community-driven token created on the Binance Smart Chain (BSC) Blockchain to donate towards humanitarian efforts in the Tropical community. We aim to contribute as much as 300 BNB (an increase from the earlier 100 BNB target) towards this effort. Developers of this project saw an opportunity to disrupt a polluted token ecosystem filled with scam tokens and rug pulls (removing liquidity, thus allowing no buy/sell transaction to happen). Pumps and dumps are the names of the game in this field. There are no actual donation tokens for a highly sentimental and pressing cause, such as the Tropical communities in the ecosystem. At the same time, we realize that the power of blockchain allows for anyone to participate in a permissionless, trustless, and thoroughly transparent environment. No intermediary is needed to Participate in any projects. It's the Web 3.0 revolution, and it's here. Thus, upon seeing these obvious gaps, Platanaso was born.
